

I AM RECEIVING OR HAVE RECEIVED IMMUNOTHERAPY

Treatment Name:

PATIENT ADVICE: If you feel unwell or develop any of the following signs or symptoms:

- Fever or Chills
- Diarrhoea or blood/mucous in stools
- Increase in frequency of stools
- Shortness of breath or breathing difficulties
- New or worsening cough
- Stomach/abdominal pain or discomfort
- Nausea or vomiting
- Change in amount or colour of urine
- Extreme tiredness or muscle weakness
- Numbness or tingling in hands/feet
- Headache or blurred double vision
- Yellowing of eyes or skin
- Any new symptoms not normal for you

Side effects can happen at anytime during treatment or after treatment has completed, so it is important to let your healthcare team know about any changes.

DO NOT DELAY!

Call your triage hotline number IMMEDIATELY on:

I AM RECEIVING OR HAVE RECEIVED IMMUNOTHERAPY

Advice to Healthcare Professionals

The patient is at risk of autoimmune side effects:

- Diarrhoea and Colitis
- Hepatotoxicities
- Pneumonitis
- Addisonian Crisis & other endocrinopathies
- Neuropathies
- Renal Toxicities
- Skin Rashes
- Cardiac Toxicity
- (this list is not exhaustive)

Immuno-oncology Toxicity Management Guidelines:

Steroids are frequently indicated in the management of side effects and do not affect the efficacy of immunotherapy.
